PATCH & PLANT — FREE PRINTABLE

Home & Garden Starter Checklist

The first ten projects in a sensible order, a season-by-season planting reminder, and a notes page for what worked. Print it, pin it to the shed door.

Your first 10 projects (in order)

1. Paint one room properly — prep, cut in, two thin coats.
2. Fix the dripping faucet you've been ignoring.
3. Patch and sand every drywall ding in the hallway.
4. Hang the heavy picture — into a stud this time.
5. Build one raised garden bed (4×8 ft).
6. Fill it with the thirds mix: compost, topsoil, aeration.
7. Plant radishes, lettuce and bush beans — the forgiving three.
8. Add one cherry tomato in the sunniest corner.
9. Start a simple compost pile or bin.
10. Write down what worked (use the notes box below).

Season-by-season planting reminder

- **Spring:** sow radishes, lettuce, peas; transplant tomatoes and peppers after last frost.
- **Summer:** beans, zucchini, cucumbers; water deeply at the base; harvest little and often.
- **Autumn:** garlic in the ground, lettuce and radishes again, clean up beds, add compost.
- **Winter:** herbs on the windowsill, plan next season, order seeds early.

Season notes — what worked?
